

1/23/2017

To the Management of Garden Electric, Inc.,

Snyder Insurance & Financial Services discovered Garden Electric via a recommendation from a Com Ed supervisor.

Com Ed sent us notice of a shutdown and for a number of reasons, gave us only about 48 hours to get help for our problem; which Garden Electric solved.

We have an insurance agency located in Darien, IL which staffs about 20 full time people. Com Ed planned to shut down the power for most of the day.

I called Garden Electric and spoke with Kurt who said he would see what generators were available and get right back to me. Kurt called me back and said he would have an electrician and generator there when I needed it. The day of the power shut down Garden Electric had an electrician here who worked quickly and had us up and running, right on time.

Kurt and Garden Electric did a great job for us, with very short notice. Additionally, their rates were very fair and reasonable.

I would highly recommend Garden Electric to anyone who wants a great job done for a fair price.

Sincerely

Tom Snyder
