RE: Village of Glenview Public Works

Dear Mr. Moss,

I'd like to share with you our thanks for a job exceptionally performed. The Village of Glenview had long anticipated the need for an emergency generator capable of handling the full electrical load of the building especially during its busiest time; that of the worst weather where electrical outages are most prevalent. When design and funding came together, Glenview sought an electrical contractor versed in the connection of emergency generators and automatic transfer switches especially as a retrofit.

From the removal of the old equipment, rigging and installation of the new, to coordination of labor and planned outages during changeover, to the courtesy of your electricians and the ease at which our needs were understood, this project was completed smoothly, timely, and all within budget. Garden Electric has earned their way to our "A-list" and will be included on future bids for electrical projects.

Please extend our gratitude to your staff.

Most sincerely,

Eric Chapman
Lead Facilities Technician
Village of Glenview
Department of Facilities
